JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

## CEREBROSPINAL MENINGITIS IN TEXAS.

Surg. Guiteras at Galveston reports the occurrence of 10 cases of cerebrospinal meningitis, with 7 deaths at Galveston from February 23 to 29, inclusive.

At Houston the health officer reports the occurrence of 12 cases, with 4 deaths during the week ended February 17.

## PLAGUE-PREVENTION WORK.

### DISTRIBUTION OF POISON.

In connection with the making and maintenance of a squirrel-free zone around the cities of California on San Francisco Bay, 1,719 acres of land in Alameda County were covered with poison during the week ended February 17, 1912.

During the same period 4,870 acres of land in San Joaquin County and 3,040 acres in Stanislaus County were covered with poison for the purpose of eradicating plague foci.

### RECORD OF PLAGUE INFECTION.

Places.	Date of last case of human plague.	Date of last case of rat plague.	Date of last case of squirrel plague.	Total number of rodents found infected since May, 1907.
California:				
Cities—				
San Francisco.....	Jan. 30, 1908.....	Oct. 23, 1908.....	None.....	398 rats.
Oakland.....	Aug. 9, 1911.....	Dec. 1, 1908.....	do.....	126 rats.
